Corporate governance involves a set of relationships between a company's management, its board, its shareholders and other stakeholders, and is a key element in improving economic efficiency and growth as well as enhancing investor confidence. Corporate governance also provides the structure through which the objectives of the company are set, and the means of attaining those objectives and monitoring performance. This course examines various contemporary aspects of corporate governance, including issues relating to responsibility, accountability, sustainability, oversight, risk, ethics and incentives. The course is multi-disciplinary, integrating concepts from the disciplines of accounting, finance, law, economics, and business ethics. It will prove most useful to those seeking a thorough introduction to the subject for both academic and applied purposes.
