

# Course Descriptions Exchange 2022-2023

Course Title Behavioural Economics  
 Course Code EBC2094  
 ECTS Credits 6,5  
 Assessment Whole/Half Grades

| Period | Start      | End        | Mon | Tue | Wed | Thu | Fri |
|--------|------------|------------|-----|-----|-----|-----|-----|
| 2      | 31-10-2022 | 16-12-2022 | X   |     |     | X   |     |

Level Intermediate  
 Coordinator Thomas Meissner For more information: [t.meissner@maastrichtuniversity.nl](mailto:t.meissner@maastrichtuniversity.nl)  
 Language of instruction English

Goals The goal of the course is to provide the students with the necessary sensitivity when applying theoretical models. After the course students should be able to identify the most important reasons why humans deviate from behaviour predicted by the commonly used model of the homo oeconomicus. Moreover they should be able to understand formal modelling of deviant behaviour.

Description PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. A RE-EMERGENCE OF THE CORONAVIRUS AND NEW COUNTERMEASURES BY THE DUTCH GOVERNMENT MIGHT FORCE COORDINATORS TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS.

The traditional model of the homo economicus is ubiquitous in microeconomic theory. Economic agents are assumed to be rational utility maximisers with self-regarding preferences and unlimited processing capacities. Common sense and the results of economic experiments show that this is not always the case. Often people behave differently than predicted by theory. In this course, we will deal with the following problem statements:

- 1) When does microeconomic theory apply and when does it lose its predictive power?
- 2) If it does not apply, what concepts and models can be used to either extend or to substitute the current theory in order to describe human behaviour?

Specifically, we will discuss the following issues:

- Non-expected utility theory
- Intertemporal choice
- Social preferences
- Reciprocity
- Levels of analytical reasoning
- The role of mistakes

In addition, we will touch on the following topics:

- Mental accounting
- Heuristics
- Neuroeconomics

Literature There is no one textbook that will cover the course. References and papers will be made available to the students at the beginning of the course.

Prerequisites Microeconomics

- Ability to think analytically
- Basic game theory is not necessary but helpful: simple equilibrium concepts such as (pure and mixed strategy) Nash equilibrium and subgame perfect Nash equilibrium.
- Exchange students need to major in Economics

an advanced level of English

Teaching methods PBL

Assessment methods Final Paper / Participation / Written Exam
