This course provides an in-depth treatment of various advanced financial reporting methods that play a major role in the financial reporting of multi-national companies. It covers both measurement and (footnote) disclosure issues. Topics that will be discussed in detail include provisions and contingent liabilities, financial instruments, impairment, business combinations, and consolidation of (foreign) subsidiaries. Although a substantial part of the course will focus on the practical application of International Financial Reporting Standards (IFRS), the rationale behind the standards will also be discussed using insights from academic literature. The course also addresses broader corporate reporting issues such as Corporate Social Reporting and non-GAAP reporting, as these alternative reporting metrics provide additional information to market participants and stakeholders.

Literature	Picker, R., Leo K., Loftus J., Wise V., Clark K., and Alfredson R. "Applying International Financial Reporting Standards, 3rd edition, Wiley.
