Goals	Students will be able to: * Predict how factors like relativity, ownership, social influence, arousal, and social market norms may influence consumer behavior * Understand that consumers do not always act "rational" * Make suggestions as to how marketers may benefit from consumer "irrationalities" * Critically interpret research findings on the topic of irrational consumer behavior * Identify the most appropriate statistical test for analyzing basic experimental data * Identify the most appropriate experimental design for a specific research question * Design a high-quality questionnaire * Understand the different sampling procedures and measurement scales that are used in consumer research * Work in teams * Provide constructive feedback * Organize and facilitate tutorials on the topic of irrational consumer behavior
Description	PLEASE NOTE THAT THE INFORMATION ABOUT THE TEACHING AND ASSESSMENT METHOD(S) USED IN THIS COURSE IS WITH RESERVATION. A RE-EMERGENCE OF THE CORONAVIRUS AND NEW COUNTERMEASURES BY THE DUTCH GOVERNMENT MIGHT FORCE COORDINATORS TO CHANGE THE TEACHING AND ASSESSMENT METHODS USED. THE MOST UP-TO-DATE INFORMATION ABOUT THE TEACHING/ASSESSMENT METHOD(S) WILL BE AVAILABLE IN THE COURSE SYLLABUS. The Consumer Psychology course is a specialized course in the Strategic Marketing Master program that seeks to explore the fundamental issues of conducting scientific research in the area of customer behavior. In addition, it provides students with in-depth and advanced level insights in the (sometimes irrational) behavior of customers. By the end of this course, students will understand how (e.g.,) emotions, social influence, expectations and context affect consumers' choices and spending behavior. Moreover, students will gain insight into how these irrationalities can affect their personal life, their business life, and the way they look at the world. As a bonus you will also learn how much fun consumer science can be, and how to see more clearly the causes for our everyday behaviors, including the many cases in which we are "predictably" irrational. The course consists of two parts. The first part is dedicated to the fundamentals of conducting scientific research in the area of customer behavior (i.e., experimental designs, sampling procedures, measurement scales, questionnaire design, basic statistical tests). The second part is dedicated to discussing and reviewing academic articles on the topic of consumer behavior (facilitations).
