

Course Descriptions NonDegree 2023-2024

Course Title Decision Support Systems and Business Modelling
 Course Code EBC2088
 ECTS Credits 6,5
 Assessment Whole/Half Grades

Period	Start	End	Mon	Tue	Wed	Thu	Fri
5	15-4-2024	7-6-2024		X			X

Level Intermediate/Advanced

Coordinator Andre Berger For more information:a.berger@maastrichtuniversity.nl

Language of instruction English

Goals Understanding the role and operation of decision support systems. Independent development of a decision support system.
 Master programming in Excel and the design of user interfaces in VBA for Excel.

Description A decision support system (DSS) is a model-based or knowledge-based system intended to support managerial decision making in semi-structured or unstructured situations. A DSS is not meant to replace a decision maker, but to extend his/her decision making capabilities. It uses data, provides a clear user interface, and can incorporate the decision maker's own insights. During the course, you get acquainted with decision support systems, their use and their most important components. You learn how to design and develop a decision support system that facilitates decision making - in the context of a company or service provider - through specific selection criteria and constraints. This will require precise communication and efficient and harmonious cooperation between you and your teammate.

Very importantly, you learn how to code in the programming language Excel VBA, in order to build a decision support system. This will help you develop and improve your skills in algorithmic thinking. In particular, you learn how to create userforms, and how to use tools provided by the toolbox. You learn essential programming techniques and constructs such as loops, subs, functions and macros. All this knowledge will be very useful basically in any programming environment.

In addition, you learn how to describe and present such a decision support system in the form of a report.

Literature We will provide a reader with all necessary information. Other resources include, but are not limited to:
 * Albright, S. C. (2006). VBA for Modelers: Developing Decision Support Systems Using Microsoft Excel (2nd ed.). Duxbury Press.
 * Holsapple, C. W. and A. B. Winston (1996). Decision Support Systems; a knowledge-based approach. West Publishing Company.
 * Mallach, E. G. (2000). Decision Support and Data Warehouse Systems. McGraw-Hill.
 * Sauter, V. (1997). Decision Support Systems. John Wiley & Sons inc.
 * Seref, M. M., R. K. Ahuja, and W. L. Winston (2007). Developing Spreadsheet-Based Decision Support Systems. Belmont, USA: Dynamic Ideas.
 * Turban, E. and J. E. Aronson (2007). Decision Support Systems and Intelligent Systems (8th ed.). Prentice Hall Business Publishing.

Prerequisites Basic mastery of Excel, or an alternative spreadsheet application: cell referencing, building formulas, use of logical functions.
 This does not include mastery of VBA for Excel: training in VBA programming is part of the course.

An advanced level of English.

Teaching methods Lecture / Groupwork / Coaching

Assessment methods Final Paper / Assignment / Presentation
