

Course Title	Empirical Analysis of Financial Markets							
Course Code	EBC4010							
ECTS Credits	6,5							
Assessment	Whole/Half Grades							
Period	Period	Start	End	Mon	Tue	Wed	Thu	Fri
	5	15-4-2024	7-6-2024	X			X	
Level	Advanced							
Coordinator	Peter Schotman For more information:p.schotman@maastrichtuniversity.nl							
Language of instruction	English							
Goals	The purpose of the course is to provide students with an overview of empirical methods and stylised facts that will enable them to make their own assessment of events on financial markets.							
Description	<p>In this course we consider in depth the fluctuations of stock prices. The purpose of the course is to provide you with an overview of recent empirical research in asset pricing and portfolio management. How are theoretical models of asset pricing being tested in practice? What are the strengths and weaknesses of various methodologies? What kind of statistical techniques are used?</p> <p>Statistical methods in empirical asset pricing have evolved into a separate field called financial econometrics. These techniques are specifically designed to answer typical questions in finance. Examples are models of risk that look at how risk is measured, how it evolves over time, and how risks in different stocks are related. It also considers probabilities of crashes, bankruptcies and defaults, and statistical tests for the performance of trading strategies.</p> <p>A more recent development are prediction models that build on insights from machine learning and advances in big data methodologies. These techniques seem to uncover new patterns in stock prices. From an investment perspective it is important to assess whether such new facts will remain or will be arbitrated away as soon as large investors start trading to exploit these patterns. In the course we will review and discuss interpretations of new techniques and empirical findings.</p> <p>A second aim of the course is to let you gain some experience in doing empirical research. An important aspect of the course is learning about the characteristics of stock returns by doing a small research project. The research projects are concerned with predictability of stock returns and the profitability of various trading strategies based on (seeming) anomalies. At the end of the course you should be able to make your own assessment about events on financial markets. Are reported superior returns pure chance, statistical illusion, a reward for risk or really an anomaly?</p>							
Literature	recent research papers - recent journal articles							
Prerequisites	Knowledge of basics of asset pricing and portfolio management, and linear regression models. Exchange students need to have obtained a Bachelor degree in economics or business administration, and sufficient quantitative background. Exchange students need to major in finance in their master. An advanced level of English							
Teaching methods	Lecture / Assignment / Groupwork / Research							
Assessment methods	Final Paper / Written Exam / Assignment / Presentation							
Evaluation in previous academic year	For the complete evaluation of this course please click <a href="http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM">http://iwio-sbe.maastrichtuniversity.nl/rapporten.asp?referrer=codeUM</a>							
This course belongs to the following programme / specialisation	Master Business Research - No specialisation				Year 2 Free Elective(s)			
	Master Business Research - Operations Research				Elective Course(s)			
	Master Econometrics and Operations Research				Elective Course(s)			
	Master Economic and Financial Research - Econometrics				Elective Course(s)			
	Master Economic and Financial Research - Econometrics				Year 1 Core Course(s)			
	Master Economic and Financial Research - No specialisation				Elective Course(s)			
	Master Financial Economics - Asset Pricing				Compulsory Course(s)			
	Master Financial Economics - Banking				Elective Course(s)			
	Master Financial Economics - Financial Analysis				Compulsory Course(s)			
	Master Financial Economics - No specialisation				Core Course(s)			
	Master Financial Economics - No specialisation				Elective Course(s)			
	Master Human Decision Science				Elective Course(s)			
	SBE Exchange Master				Master Exchange Courses			
	SBE Non Degree Courses				Master Courses
